

VP Corner by Fred Nelson

The quest for the new VW or Garage/Barn find....

As many of you know I sold the bruiser (74 sedan), received my full asking price. I then bought a 1970 type 1 sedan that has been converted into a baja bug. I found this car on the internet, contacted the owner to go see it expecting the worst and in actuality....found a gem.

We arrived to find the bug in 4 ft deep grass only to discover it was a "california" bug rust free car. Upon closer look found no motor in car (at this point I was still interested because body was clean) and price was right. Then the owner said "would you like to see the motor now, it's in the garage" I said sure expecting a basket case or blown motor only to find a totally chromed out 1776 with down draft 44 weber with new clutch attached.

Needless to say I purchased the bug and have since spent too many hours cleanin her up (if you ask my wife anyway).

I'm here to tell you there still is garage finds or barn finds out there, so be patient and know what you want to wait forit will come

The previous owner was just tired of VWs and wanted it gone..... by the way the price was \$500.00.

Check it out @ J B J or at Jays at our next meeting.
