Eureka & Tulsa...here we come!!!!

New Single Seat VW

If you could go to Shanghai for a vacation, buy two or more of these cars (one for your wife and one for yourself and perhaps one for each of your kids) and have them shipped to North America, you would still spend less money than if you bought a car in Canada. Getting the car(s) into USA is still an ordeal.

This is not a toy or concept car. It is a newly developed, road-proven single seat car in a highly aerodynamic, tear-shaped style. It is ready to be launched as a single-seater for sale in Shanghai in 2010 for a mere RMB 4,000 (US\$600)! Interested? Wait till you learn that it will cruise at 100-120 km/hr with an unbelievable 0.99litre/100 km (258 miles/gallon) performance!!

Impressed? You will be after you have read all the details below about the hi-tech and space-age material input to this car. The most economic car in the world will be on sale next year. Better than an electric car - 258 miles/gallon:

IPO 2010 in Shanghai

This is a single seat car From conception to production: Three years and the company is headquartered in Hamburg, Germany. Will be selling for 4000 yuan (equivalent to US\$600). Gas tank capacity = 1.7 gallons; Speed = 62 - 74.6 miles/hour; Fuel efficiency 258 miles/gallon

**Travel distance with a
full tank = 404 miles**
